

## Remote Input Output

The Pharos RIO 80, 44 and 08 (Remote Input Output) devices provide a convenient and scalable way to add inputs and outputs to a Pharos Designer system for show control and integration. Each device can be placed where it is needed and connected to the Controllers over an Ethernet network. Each RIO has a multi-protocol serial port, supporting DMX output, and a combination of multi-functional digital/analog inputs and relay outputs.

## RIO Features

### Designer Trigger

Timing is everything. Whatever the stimulus, Designer Trigger can handle it. You can control your lighting with responsive, reactive programming. Designer Trigger is a rules engine that uses conditional logic and a broad range of interfaces and protocols. Send and receive any command, to and from any system. Conditional logic is supported, along with a powerful built-in scripting language for unlimited flexibility.

### Scalable

Up to 200 Remote Devices can be combined with one or more Pharos Designer Controllers on the same network to build the ideal system for your installation. Each Remote Device is easily addressed using a convenient thumb wheel. Whether one Controller or many, it's all easily programmed using our Designer software.

### Pharos Designer

Programmed and configured using the free Pharos Designer software – available for Windows or macOS – with upload over Ethernet.

### Multi-Protocol

Every RIO has a multi-protocol serial port, whose protocol (RS232 or RS485), data rate and format settings (baud, parity, stop bits, etc.) are configurable in software. The port can also be configured to output up to 96 channels of DMX512.

### Installer Friendly

Made for permanent installation, with installer-friendly connectors and easy DIN rail mounting.

### Flexible Inputs

Each input is individually configurable in one of three modes. As a Contact Closure an external volt-free switch may be connected across the input. As a Digital Input an external voltage source (up to 24V) can be connected across the input and thresholds for 'high' and 'low' triggering can be set. As an Analog Input a variable external voltage can be measured within a configurable range.

### Relay Outputs

Our outputs use solid-state relays to ensure silent operation and long-term reliability. They are designed for low voltage, low current switching (48V, 0.25A) and are also fully isolated. Where necessary they enable higher currents to be controlled from a Pharos Designer system by integration with commonly available third-party contactors.

### Power-over-Ethernet

As a Power-over-Ethernet (PoE) device, the RIO can be placed at any remote location and only needs a single Ethernet cable that provides both power and data.

### Network

Works with any Pharos Designer Controller and links to it using standard protocols over an Ethernet network.

## Capabilities

<b>Contact Closure</b>	Connect an external volt-free switch between input and ground (internal 2.2kohm pull-up to 5V)
<b>Digital In</b>	Connect an external voltage source between input and ground (24V maximum; internal 2MOhm pull-down to 0V); software configurable low/high threshold
<b>Analog In</b>	Connect an external voltage source between input and ground (24V maximum); software-configurable range
<b>Relay Outs</b>	Individually isolated (1KV) relay outputs (48V 250mA)
<b>Serial Data</b>	RS232, RS485; configurable port; send/receive free syntax in ASCII, HEX or decimal
<b>DMX Out</b>	96 channels (USITT E1.11-2008)

## Interfaces

<b>Ethernet</b>	RJ45 socket for 10/100Base-TX Ethernet with Link/Data LEDs; Static IP or DHCP; Power-over-Ethernet (PoE)
<b>Serial Inputs</b>	RS232 / RS485 / DMX out *
<b>Relay Outs</b>	Individually selectable operating mode for contact closure, digital or analog input (24V maximum) * Individually isolated (1KV) solid-state relay outputs rated at 48V 0.25A (AC/DC) * An external PSU is required to power the relay outputs

## Specifications

<b>Power Required</b>	PoE (IEEE802.3af, Class 1), 1.5W typical
<b>Configuration</b>	Any Pharos Designer Controller
<b>Addressing</b>	Pharos Designer 2
<b>Temperature</b>	By rotary selector switch
<b>Humidity</b>	0°C to 50°C (32°F to 122°F)
<b>Ingress</b>	10-50% relative, non-condensing
<b>Physical</b>	IP40 4 unit wide DIN rail mounting enclosure (DIN43880 / EN60715 (35/7.5 rail)) 7.2 x 9 x 5.8 cm (2.8 x 3.5 x 2.3 in) 0.3 kg (0.7 lbs)
<b>Shipping</b>	20 x 15 x 12 cm (8 x 6 x 5 in) 0.5 kg (1.1 lbs)
<b>Recovery</b>	Hardware watchdog and recessed reset button

## Order Code & Variants

<b>RIO 08</b>	Designer Remote Input Output Device 08 (0 input, 8 output, Serial/DMX)
<b>RIO 44</b>	Designer Remote Input Output Device 44 (4 input, 4 output, Serial/DMX)
<b>RIO 80</b>	Designer Remote Input Output Device 80 (8 input, 0 output, Serial/DMX)

*Pharos Designer Controller required*

## Warranty & Certifications

<b>Warranty</b>	5 years
<b>Certifications</b>	CE compliant, UKCA compliant, ETL/cETL listed.

\* Install-friendly 0.200" (5.08mm) plug in rising clamp connectors (included)
